## INTRODUCTION TO GREEN ECONOMY E-COURSE

<https://unccelearn.org/course/view.php?id=51&page=overview>

### Target audience

- Civil servants in national ministries, sub-national departments and local authorities
- Environmental managers in private sector and civil society organizations
- Faculty, researchers and students
- Interested citizens

### Learning objectives

- Describe the rationale and core concepts for realizing an inclusive green economy against business-as-usual practices
- Identify enabling conditions for greening national economies
- Outline principal opportunities and challenges in key sectors
- Provide examples of national strategies and planning to advance an inclusive green economy
- Distinguish international frameworks and initiatives in support of an inclusive green economy

### Methodology and format

The course is self-paced and not moderated. It is divided into five modules to help reach the learning objectives. The modules are self-standing. Throughout the course, learners will be provided with references and publications on inclusive green economy if more in-depth study is desired. Each module features an interactive lesson, video and quiz. Approx. 10 hours seat time.

### Certification

To receive a certificate of completion, all five modules must be completed and the associated quizzes successfully passed

### Module 1: Understanding where we are – The rationale for advancing an inclusive green economy

- Turning the economy around
- The rationale for embarking on the green transition
- The 2030 Agenda and inclusive green economies

### Module 3: Sighting the destination – Key sectors with high greening potential

- The national context of sustainable development
- Investing in natural capital
- Investing in built capital

### Module 5: A helping environment – International frameworks and initiatives in support of inclusive green economies

- International frameworks guiding the green transition
- Development finance for an inclusive green economy
- Inclusive green economy initiatives around the world

### Module 2: Focusing on the instruments – Enabling conditions for structural change

- Promoting smarter public financial flows
- Establishing sound regulatory frameworks
- International regulatory mechanisms
- Mobilizing private finance
- Enabling change agents through capacity building

### Module 4: Devising a pathway – Strategies and planning for reaching green economy policy objectives

- Engaging stakeholders in the green transition
- Integrating green considerations in development planning
