RECP training for Azerbaijani industries

The presentation of RECP in-plant assessment reports

Meeting objectives, expected outputs and outcomes

- To present findings from each RECP in-plant assessment report
- To summarize the general outcomes and experience from the RECP assessments
- To conclude the RECP Demonstration Project with ways forward for both the RECP trainees and the assessed companies in Azerbaijan.

This training session shall include both presentations as well as discussions and feedback on the strategies needed to communicate, present, and critically examine the assessment's outcomes in order to facilitate the next steps that could be taken by each company's management. This is an important approach as the management's acceptance or rejection of the RECP proposal depends, to some degree, on the level of professionalism, knowledge, and delivery of findings for the identified RECP measures.

This training session is the final part of the RECP learning process. Here, the trainees will get the opportunity to learn from the experience of other groups and exchange views from the consultations. A session will also be dedicated to wrapping up, followed by comments and feedback, other opportunities identified during the assessments, RECP techniques and so on.

Participants

The meeting will gather around 30 participants comprising RECP trainees, members from the UNIDO team, RECP experts, as well as the representatives from ACE Group, the National Implementing Partner of UNIDO in Azerbaijan.

Practical Information

The event will take place online, using the Zoom platform. To attend the event, please register in advance:

Background

The overall RECP trainings programme consists of a one-day information seminar, two training sessions (each comprising two workshops), and a third workshop of two days which focuses on the results and presentation of the in-plant assessment reports. The information seminar and the training sessions were already completed in December 2021-October 2022, with the remaining event closing the RECP training for experts in Azerbaijan.

About EU4Environment

The “European Union for Environment” (EU4Environment – Green Economy) Action helps the Eastern Partnership countries preserve their natural capital and increase people's environmental well-being, by supporting environment-related action, demonstrating and unlocking opportunities for greener growth, and setting mechanisms to better manage environmental risks and impacts.

It is funded by the European Union and implemented by five Partner organisations - OECD, UNECE, UNEP, UNIDO, and the World Bank – over the 2019-2024 period, with a budget of EUR 20 million.
