

**Training Workshop on Current Issues of the Strategic Environmental
Assessment Procedure in Ukraine: Legal Aspects**

AGENDA

**25 May 2023, Kyiv, Ukraine
14:00 – 17:45 (Kyiv EEST)**

This workshop will be delivered as a virtual event, using the Zoom platform. All registered participants will receive connection details to access the platform.

Action implemented by:

**Training Workshop on Current Issues of the Strategic Environmental Assessment Procedure in
Ukraine: Legal Aspects
25 May 2023, 14:00 – 17:45, Kyiv, Ukraine**

Background

Within the framework of the European Union-funded EU4Environment programme, UNECE is assisting the Eastern Partnership (EaP) countries, including Ukraine, in comprehensive capacity-building and institutional building on Strategic Environmental Assessment (SEA) and transboundary Environmental Impact Assessment (EIA) and in finalizing legal reforms in this area.

SEA is a relatively new tool for implementing the country's environmental policy based on a simple principle: it is easier to prevent negative environmental effects at the planning stage of a strategic document rather than identifying and remedying them during its implementation. The SEA of state planning documents, particularly urban planning documents, enables a comprehensive evaluation of the likely environmental, including health, effects of the plans and using evaluation results to prevent or mitigate adverse effects on the environment in the spatial planning process.

The objective of the SEA is to promote sustainable development of territories/areas by providing for a high level of protection of the environment, including health of the population, and integration of environmental considerations into the development and adoption of state planning documents.

The first of the two training workshops in May 2023 will have the target audience focus on the specifics of the carrying out of the SEA procedure, particularly for urban planning documentation, in line with Ukrainian legislation and the country's commitments to implement SEA under its Association Agreement with the EU and the UNECE Protocol on SEA with a view to strengthening the institutional capacity of regional administrations and Kyiv city state administration, as well as local self-government bodies.

Meeting objectives, expected outputs and outcomes

- To familiarize the target audience with Ukraine's international commitments to implement SEA, and to discuss how the SEA is specifically embedded within the Ukrainian legal system;
- To introduce the main regulatory and legal requirements for SEA and related current amendments;
- To present the latest changes and developments in urban planning legislation.

Overall, as part of the series of the SEA training workshops with a focus on Ukraine's urban planning, this event is anticipated to support relevant departments/units at regional and local levels to use the SEA more effectively for greening Ukraine's post-war urban reconstruction efforts. The event will include interactions with the target audience in the form of guided discussions, Q&A, interactive Mentimeter-based polls/surveys etc.

Participants

Representatives of relevant departments (environmental protection, healthcare, urban planning and architecture) in Ukraine's regional administrations and Kyiv city state administration, as well as representatives of local self-government bodies .

Practical Information

The event will be conducted in Ukrainian only. A final workshop report will be prepared in both English and Ukrainian to more effectively capture important take-aways and lessons learnt.

Ahead of the workshop, invitation letters will be sent to the regional administrations and Kyiv city state administration, as well as regional councils. Participants will be pre-registered through filling in Google forms.

The training will be organised as a virtual event using the Zoom platform. All registered participants will receive connection details to participate in the event.

The Mentimeter application will be used to ensure interactive online communication between event organisers, facilitators/speakers and participants, enabling the participants to anonymously participate in snap polls/surveys throughout the event.

The event will be facilitated by consultants to UNECE.

About EU4Environment

The "European Union for Environment" (EU4Environment – Green Economy) Action helps the Eastern Partnership countries preserve their natural capital and increase people's environmental well-being, by supporting environment-related action, demonstrating and unlocking opportunities for greener growth, and setting mechanisms to better manage environmental risks and impacts.

It is funded by the European Union and implemented by five Partner organisations - OECD, UNECE, UNEP, UNIDO, and the World Bank – over 2019-2024 period, with a budget of EUR 20 million.
