Regional Workshop on Wood Tracking Systems and EU Deforestation Regulation Compliance: Strengthening Forest Governance in Eastern Partnership countries

22-25 October 2025, Yerevan, Armenia

Background

Deforestation and forest degradation drive climate change and biodiversity loss. Illegal logging harms forests and communities, undermines sustainable forest management, and weakens transparent international trade. As the EU is a major consumer of timber from its Eastern neighbours, EU Member States and their companies can contribute to sustainable trade by reducing the entry of illegal timber into their markets and, thus, gain benefits in the long run. Promotion of legal and sustainable wood-based value chains would, on the other hand, create employment and economic activity in exporting countries. This workshop—organised under the EU4Environment Programme (Activity 4.3) — supports Eastern Partnership (EaP) countries in preventing illegal logging, aligning with EU legislation, and promoting sustainable timber trade through stronger control systems and capacity building.

Objectives

This workshop is designed to help stakeholders from EaP countries implement effective wood tracking systems (WTS) as a means to control illegal timber harvesting, improve forest governance, and promote sustainable forestry, in alignment with the requirements of the EU Deforestation Regulation (EUDR). The event will enhance knowledge sharing through an overview of forest management trends, key WTS tools, introduction to technologies, country case studies and interactive sessions.

Organisers

The workshop is jointly organised by the World Bank and the French international forestry consulting company ONF International (ONFI), a subsidiary of the French National Forest Office, and its consortium members SOLUTON, CENN, and BIOTICA.

Participants

The meeting will bring together representatives from line ministries, forestry agencies, research institutions, academia, CSOs, and other relevant government bodies from EaP countries. Representatives of EU Member States, EU institutions, and other international partners will be invited to take part in discussions.

Venue

Venue: DoubleTree by Hilton Hotel Yerevan City Centre, Armenia

Meeting room: Milano Conference Hall

Practical arrangements

The workshop will be held in person and via ZOOM. Participants are asked to register for the event in advance via this [link](#).

The meeting will be conducted in English and translated simultaneously in [Armenian](#) and [Ukrainian](#).

About EU4Environment

Since 2018, the “European Union for Environment” (EU4Environment) Action has helped the Eastern Partnership countries preserve their natural capital and increase people's environmental well-being, by supporting environment-related action, demonstrating and unlocking opportunities for greener growth, and setting mechanisms to better manage environmental risks and impacts. The programme was funded by the European Union and principally implemented over the 2019-2024 period by OECD, UNECE, UNEP, UNIDO and the World Bank. Over 2025-2026 period, the World Bank will finalise the implementation of programme's Result 4 area.
